

# Ascot Lean-To Polycarbonate Clad

The Ascot design uses a single rolled tubular box section for the roof arches giving a clean line to the roof. The lean-to format can be used to butt up to existing walls or over sail existing roofs and gutters without creating an additional roof valley. The roof of the canopies can either be clad with flame retardant waterproof fabric or polycarbonate.

**Warranties**

Framework - 25 years  
Polycarbonate Cladding - 10 years against discolouration through sunlight

**Sizes**

The maximum width for the Ascot is around 6m but each canopy as fabricated to suit the clients requirements.

**Applicable Standards**

BS6399 Pt.2 - Wind & Snow Loadings; BS5950 - Structural Use of Steelwork in Buildings

**Roof Shape**

Curved Lean-to

**Cladding**

Flame Retardant (Class 1) Structured Opal (opaque) Polycarbonate with a 10 year guarantee against discolouration from sunlight

**Cladding Fixing**

Two part Aluminium Glazing Bar with rubber gaskets to allow for thermal expansion of the roofing sheets and secure fixing

**Standard Finish**

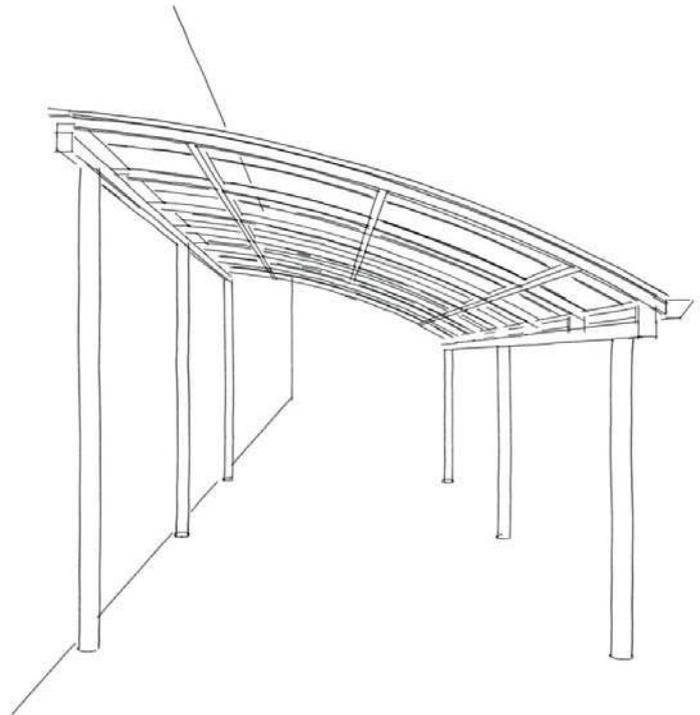

Shot blast, zinc sprayed and polyester powder coated to any standard RAL or BS colour

**Rainwater Goods**

Colour coded Aluminium gutters included as standard to all eaves sides, with down pipes terminating at ground level

**Foundation Fixings**

Cast in-situ anchor bolts into concrete foundation pads typically 800mm square x 600mm deep
